List of figures is included as the final pages
Note to the reader:
In this report the time for start of construction is artificially set to 1 October 2014 for the tunnel and 1 January 2015 for the bridge alternative. In the Danish EIA (VVM) and the German EIA (UVS/LBP) absolute year references are not used. Instead the time references are relative to start of construction works. In the VVM the same time reference is used for tunnel and bridge, i.e. year 0 corresponds to 2014/start of tunnel construction; year 1 corresponds to 2015/start of bridge construction etc. In the UVS/LBP individual time references are used for tunnel and bridge, i.e. for tunnel construction year 1 is equivalent to 2014 (construction starts 1 October in year 1) and for bridge construction year 1 is equivalent to 2015 (construction starts 1st January).
1  APPENDIX II - WATERBIRDS IN THE FEHMARNBELT - MAPS

1.1  Maps of aerial transect surveys in 2008/2009

1.1.1  Diver unidentified – Gavia spp.

Figure 1.1  Diver (Gavia spp.) distribution in the study area during aerial surveys (December 2008 - April 2009).
Figure 1.2  Diver (Gavia spp.) distribution in the study area during aerial surveys (January 2009).

Figure 1.3  Diver (Gavia spp.) distribution in the study area during aerial surveys (February 2009).
Figure 1.4  Diver (Gavia spp.) distribution in the study area during aerial surveys (March/April 2009).

Figure 1.5  Diver (Gavia spp.) distribution in the study area during aerial surveys (April/May 2009).
Figure 1.6  Diver (Gavia spp.) distribution in the study area during aerial surveys (October 2009).

Figure 1.7  Diver (Gavia spp.) distribution in the study area during aerial surveys (November/December 2009).
Figure 1.8  Diver (Gavia spp.) distribution in the study area during aerial surveys (December 2009).
1.1.2 Grebe unidentified – Podiceps spp.

Figure 1.9 Grebe (Podiceps spp.) distribution in the study area during aerial surveys (December 2008 - April 2009).

Figure 1.10 Grebe (Podiceps spp.) distribution in the study area during aerial surveys (December 2008).
Figure 1.11  Grebe (Podiceps spp.) distribution in the study area during aerial surveys (January 2009).

Figure 1.12  Grebe (Podiceps spp.) distribution in the study area during aerial surveys (February 2009).
Figure 1.13  Grebe (Podiceps spp.) distribution in the study area during aerial surveys (March/April 2009).

Figure 1.14  Grebe (Podiceps spp.) distribution in the study area during aerial surveys (November/December 2009).
1.1.3 *Great Cormorant* – *Phalacrocorax carbo*
